

# MEET THE EXPERT IN LOW SHRINKAGE YARN FOR WEAVERS OF AVIATION AND COMMERCIAL CARPETS

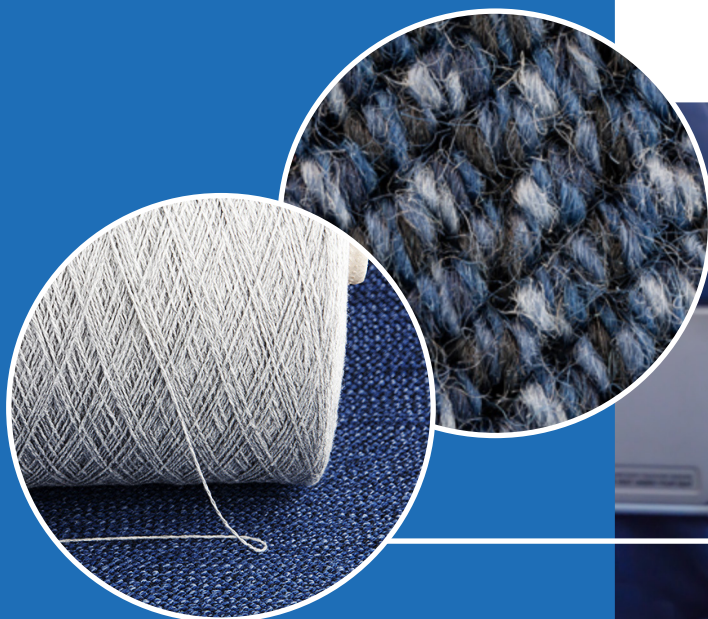

## Artofil

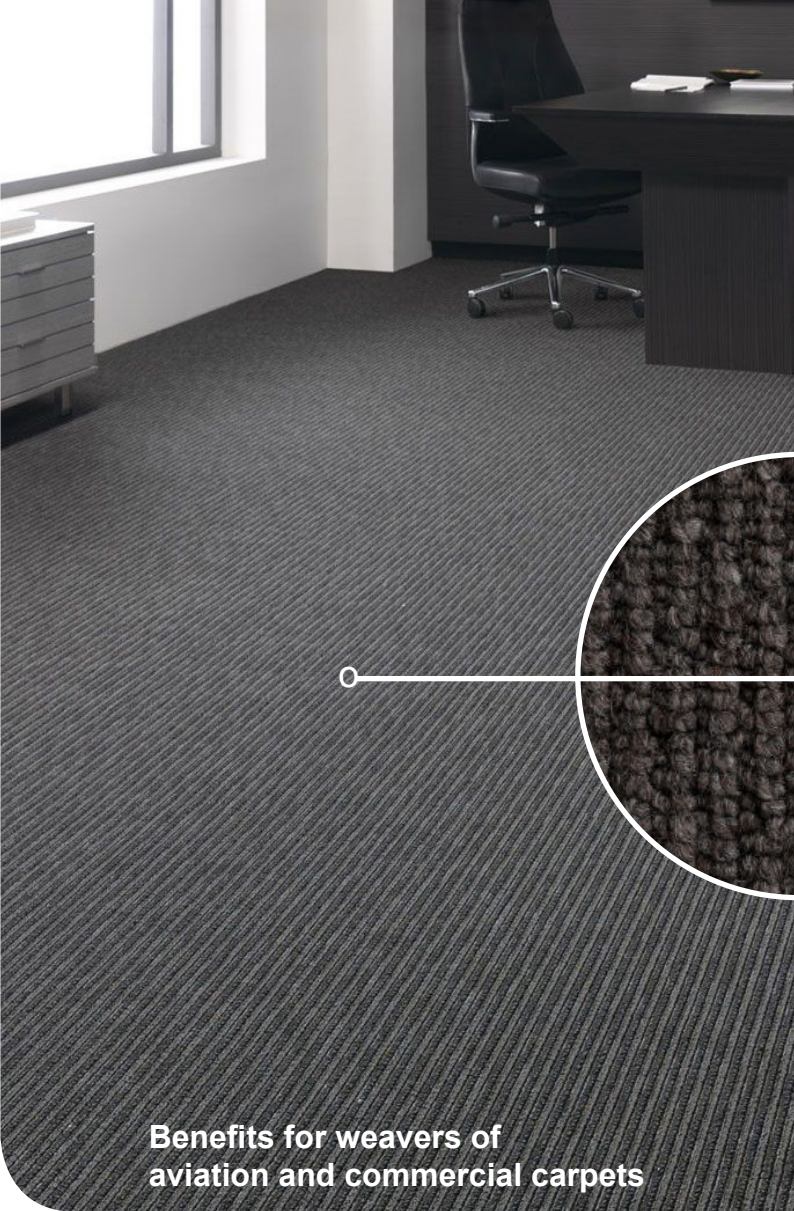

For more than 40 years Artofil has been a reliable manufacturer of high quality warp & weft yarn to carpets weavers. Weavers of aviation and commercial carpets across the globe rely on and choose Artofil for the value that its low shrinkage and flame retardant yarn add to their carpets. Based on expertise, experience and innovation our products are the best available in the market.

## Low shrinkage yarn

Hybrid glass yarn for carpet weavers used as warp and weft in aviation and commercial carpets providing following properties:

- Very low shrinkage ( $< 0.3\%$ )  
Hot air test 180/190 degrees-15 minutes.  
Method: DIN 53866 Part 3
- Very low elongation (2.5-4.5 %)
- Flame retardant
- High strength ( $> 90$  Newton)
- Twisted yarn and single yarn (typical single yarn count Tex 167—Tex 392)
- Color: Tailor made with standard colors grey, dark grey, black and beige
- Yarn delivered on beames and cones

## Benefits for weavers of aviation and commercial carpets

### Better carpets

- Dimension stability and better binding.
- Certified for high fire safety standards in aircraft industry and building interiors.
- Higher quality carpet and less waste product.

### Lower production costs

- No breakages during weaving.
- Higher weaving speed.
- No dusting during weaving.
